Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 4/16/2004 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because IDS is not complying with the PTO-1449 form. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C (1).

Claim Objections

2. Claims 12,19,21,and 26 are objected to because of the following informalities: the features "first and second chambers" in claim 12 and 26, "first section and second section" and in claims 19 and 21, "a guide" in claim in claim 21,"a hub" in claim 26. The features and claimed language are not supported by the specification and drawings. Therefore, the features are not considered.

3. The amendment filed 2/10/2004 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "first and second

Art Unit: 2834

chambers” in claim 12 and 26, “first section and second section” and in claims 19 and 21, “a guide” in claim in claim 21, “a hub” in claim 26.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

4. Claims 12-28 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. “first and second chambers” in claim 12 and 26, “first section and second section” and in claims 19 and 21, “a guide” in claim 21, “a hub” in claim 26.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Volz et al.

Regarding claim 1, Volz et al. (see figs. 1-6) disclose a motor housing for an electric motor comprising a housing (2) which defines space to accommodate the

electric motor, and a flexible partition (24); the flexible partition positioned between the housing and a housing cover (3) and providing a pressure equalizing cavity whereby the pressure equalizing cavity is connected to the outside environment via the housing cover.

Regarding claims 2-11, it is noted that Volz et al. disclose all the claimed features of the invention.
